

1 Data and Hypothesis

For this study, I replicated data of the article titled as Ethnicity, Insurgency, and Civil War by Fearon and Laitin published in 2003.

I employed the dataset and used GDP Per Capita as independent variable and democracy score as dependent variable. I used population as a control variable.

	Model.1
GDP Per Capita	0.660** (0.020)
Populations	-0.000** (0.000)
Constant	-2.846** (0.118)
N	6331
R^2	0.146

Standard errors in parentheses

* $p < 0.05$, ** $p < 0.01$, *** $p < 0.001$

Table 1 demonstrates that the findings are in line with the hypothesis. However, population has a negative statistical coefficient.
